

Building the Future:

INTRODUCTION TO CONSTRUCTION & TRADES

June 16-17, 2025

9:00AM - 3:00PM

Industrial Arts Institute 20902 Washington Street, Onaway, MI

Get ready to roll up your sleeves and dive into the world of construction! This hands-on camp introduces students to the fundamentals of the building trades, equipping them with essential skills used by professionals in the industry.

- **Safety First** – Learn proper safety procedures when working with tools and materials.
- **Measuring & Blueprint Reading** – Understand how to read blueprints and accurately measure for construction projects.
- **Tool Mastery** – Identify and safely use a variety of hand and power tools.
- **Material Recognition** – Explore different types of building materials and their properties.
- **Construction Terminology** – Learn the language of the construction industry.
- **Teamwork & Communication** – Work collaboratively on projects, practicing problem-solving and communication skills.
- **Job Site Visit** – Tour an active construction site, see professionals in action, and learn about career opportunities in the trades.

Whether you're interested in a future career in construction or just love building things, this camp will give you a strong foundation in the trades while working on real-world projects in a fun, team-oriented environment!

Clothing required for safety:
steel-toed boots, long pants,
and shirts with a minimum
short sleeve
